PROFESSIONAL SUMMARY

Motivated Full-Stack Web Developer (Fresher) currently pursuing Programming Hero's Complete Web Development Course. Skilled in HTML, CSS, JavaScript, TypeScript, Tailwind CSS, React.js, Next.js, and authentication. Hands-on experience building personal projects that demonstrate responsive web design, component-based development, and practical problem-solving. Eager to apply technical skills, learn from experienced developers, and contribute to a software development team as a Junior Web Developer or Trainee Software Engineer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development: React.js, Next.js, Tailwind CSS

Authentication: Better Auth

Database: MongoDB

Tools & Platforms: Git, GitHub, VS Code, Vercel, Netlify

Currently Learning: Node.js and Backend Development through Programming Hero

PROJECTS

Bazar Dor — *Bangla Market Price Tracking Web Application* Live Demo | GitHub

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, DaisyUI, Better Auth

- Engineered an adaptable platform monitoring local commodity pricing to assist consumers in evaluating daily cost shifts and product variances.
- Integrated item filtration by category, rate ordering, localized vendor benchmarks, and secure authentication via credentials alongside OAuth providers.
- Designed localized numeric sorting algorithms, secured item views, UI placeholders, and fully adaptable layouts tailored for all screen viewports.

FitLog — Workout Library & Planning Application **Live Demo | GitHub**

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, DaisyUI, REST API

- Developed a responsive workout application that allows users to explore exercises, view detailed workout instructions, organize daily training plans, and save workouts for later.
- Integrated REST API data and implemented workout sorting, completion tracking, duplicate prevention, and dynamic statistics for exercise count, duration, and calories.
- Built interactive workout management features with toast notifications, loading and error states, and responsive layouts optimized for mobile, tablet, and desktop devices.

DevStack — Interactive Development Stack Builder **Live Demo | GitHub**

Tech Stack: React, TypeScript, Tailwind CSS, DaisyUI, Vite

- Developed an interactive web application that enables developers to explore technologies and build personalized development stacks by adding and removing technology selections.
- Implemented React state management, reusable components, conditional rendering, duplicate prevention, and instant toast notifications for user interactions.
- Integrated JSON-based technology data and React Suspense for data loading, with a responsive interface and mobile navigation.

EXPERIENCE (OPTIONAL — INCLUDE EVEN IF NON-TECHNICAL)

Mathematics Instructor — Holybird School & College

January 2024 – Present

- Deliver mathematics instruction by breaking down intricate quantitative concepts into accessible, well-structured lessons.
- Cultivate interpersonal communication, analytical reasoning, and core problem-solving competencies through ongoing instructional duties.
- Design curriculum outlines, direct classroom dynamics, and streamline educational objectives efficiently.
- Exhibit composure, meticulous thoroughness, and strong accountability while guiding student academic advancement.

EDUCATION

B.Sc. in Computer Science & Engineering (CSE) — World University of Bangladesh (*January 2024 – Expected Graduation 2028*)

CERTIFICATIONS & TRAINING

- **Complete Web Development Course** — Programming Hero (*Batch-14, Currently In Progress*)

LANGUAGES

- **Bengali (Bangla):** Native Proficiency
- **English:** Professional Working Competency
